**Dear Hiring Manager,**

I am writing to express my keen interest in the Senior Project Engineer position within your esteemed organization. With a solid foundation in Electronics and Communication Engineering and over 9 years of extensive experience in automation, process control, and system integration, I am eager to leverage my technical expertise and strategic insight to drive growth and innovation within your team.

In my current role as a Senior Project Engineer at Saral Controls, I have successfully led numerous projects requiring advanced knowledge in configuring and commissioning complex PLC, SCADA, and HMI systems. From project simulations to Factory Acceptance Testing (FAT) and on-site implementation, I have demonstrated proficiency in managing redundancy configurations for ControlLogix L74 and L73 controllers to enhance system reliability. Additionally, I have implemented distributed SCADA networks with backup servers to ensure continuous operation and developed SQL-based reports to support data-driven decision-making.

My site experience with projects at Piramal Glass and JRS Pharma has equipped me with hands-on skills in configuring advanced Rockwell Stratix switches, deploying PlantPAX systems, and implementing robust firewall measures to secure large control networks. I am also proficient in Ethernet, Modbus, and OPC communication protocols and am skilled in using FactoryTalk Studio SCADA for comprehensive system management.

With an in-depth understanding of automation requirements and extensive experience in managing third-party protocols, SQL databases, and key Rockwell Automation systems such as CompactLogix, ControlLogix, E300 Smart Overload Relays, and Power Flex drives, I am confident in my ability to contribute positively to your Company.

I am particularly excited about the opportunity to bridge technical solutions with strategic business goals. My ability to analyze customer requirements, propose effective automation strategies, and drive operational efficiency aligns well with the vision of your organization. I am eager to bring my problem-solving abilities and passion for innovation to your team.

I would welcome the opportunity to discuss how my background and skills can add value to your organization. Thank you for considering my application. I look forward to the possibility of contributing to your Company continued success.

**Sincerely,  
Jaydip Darbar**
